

Build Out Attenuators

Description

The build out attenuators are female to male configuration and are available with SC, FC/PC, LC, MU and ST connector styles for use on multimode and single-mode systems. Environmental stability is assured making them suitable for numerous applications including Long Haul Telecom, CATV, Local Area Network and Network Testing. All attenuators offer a high return loss with a UPC polish as standard.

Features and benefits

- Attenuation values from 1 dB to 20 dB.
- Dual wavelength 1310 /1550 nm.
- Multimode and single-mode available.
- Standard back reflection UPC -55 dB
- APC -65 dB available for single-mode.
- Complies with Bellcore GR-910-CORE.
