

## MT-RJ Connector

### Description

The MT-RJ connector is a push fit, small form factor type. This duplex connector has been designed for data applications where the small size suits applications where space is a premium consideration. The connector options are for zip cord 1.8 mm or round 3.0 mm cable. Alignment pins convert the female connector into a male connector with a simple push fit. The connectors are available in multimode and single-mode designs.

### Features and benefits

- Duplex small form factor connector
- Single-mode and multimode connectors available
- MT ferrule with RJ45 style housing
- To fit 1.8 mm zip cord or 3.0 mm round duplex cables
- Male and female connector options
