

## Lite-Link Pre-fabricated Cable

### Description

Lite-Link is an optical cable pre-fitted with optical connectors. The connectors are protected with a rugged flexible conduit and fitted with a pulling eye to ease installation. Lite-Link's unique non-crimp design uses the cables integral strength member to connect to the pulling eye; this reduces any potential stress on the fibres within the cable. The protection unit is easily removed post installation.

### Features and benefits

- Fits standard M20 capillary enclosures to IP66 rating.
- 4 - 24 core fibre counts available.
- No additional compression gland required
- Push fit or threaded gland designs available
- No specialist tooling or fibre optic knowledge required
- Suitable for multimode or single-mode applications.
