

## UODC Cable

### Description

Universal Office Distribution Cable or UODC is our standard riser grade cable with a construction suitable for internal office networks. Its added value is the moisture barrier within the cable jacket making it suitable for laying in ducts and external use. The cable consists of 900  $\mu\text{m}$  fibres surrounded by Kevlar® within a single outer jacket. This enables the cable to be robust but still relatively lightweight.

### Features and benefits

- Tight Buffered design
- 4 core to 24 core fibre counts
- Available in 9/125, 50/125 and 62.5/125
- Polyethylene or Low smoke zero halogen jacket
- Suitable for Riser installations
- Light and durable
